

# where we're going

## IN GOD'S TIME

As with any work in progress, we have hopes and dreams for future improvements. Our vision is to use the hospital as a hub to provide medical care and health education to both the local community and underserved remote villages. We also hope to grow and develop new ways to expand services and meet more needs in each department, as we use medicine as a tool to spread the Gospel of Jesus Christ.

## How can you help?

### PRAY

Pray for each patient who comes through our hospital as well as the medical staff taking care of them.

### VOLUNTEER

Our hospital needs licensed medical professionals to come to Haiti and provide continuing education to our staff.

### GIVE

To continue our work we need financial partners willing to come alongside and help us continue our mission to provide care.

### SHARE

Help us spread the word about what we're doing by giving us an opportunity to speak with your church, small group, friends, etc.

## BUILDING QUALITY HEALTHCARE

Saintard, Haiti + surrounding communities

Spreading the Gospel of Jesus Christ, through a healthcare alliance with the people of Haiti.

## who we are

January 1993 was the rudimentary beginnings of Mission Haiti Medical, as the first group of U.S. visitors representing our Indiana-based group joined together under God's guidance in Haiti. Hosted by missionary Phyllis Newby, their goal was to help with medical challenges presented in Saintard, Haiti. As the ministry evolved over the years, the building of an indigenously sustainable clinic was begun by groups from North Carolina, Tennessee, Bermuda, Barbados, Jamaica, and many other locations around the globe. The vision presented by Ms. Phyllis Newby and local pastor, Jean Marie Louis Jean, came to fruition when the clinic opened in July 2005 with three Haitian staff members.

As the clinic has grown and changed to meet the needs of the community, the current staff of over 60 Haitian medical professionals see about 500 patients per week, adding to more than 200,000 patients who have passed through the doors since the clinic opened. Since becoming a 24/7 healthcare facility in January of 2018, we continue to strive to improve services and outreach for the Haitian community.

## what we do

Currently, the hospital provides basic healthcare with both inpatient and outpatient medical services.

### HOSPITAL SERVICES

- DENTISTRY
- EMERGENCY SERVICES
- FAMILY PLANNING
