

## DENTAL DEPARTMENT Hôpital L'Eglise de Dieu Réformée

### about

In the formative years of Mission Haiti Medical, visiting dentists would pile suitcases of tooth extraction equipment on the backs of donkeys and climb mountains to remote villages to provide dental services. At that time, the only services available were pain management procedures using rudimentary extraction techniques. As time elapsed and missiologic education was gained, MHM started teaming with Haitian dental professionals until, in 2008, a basic dental clinic was opened at the hospital in Saintard. Today, our clinic, while still developing, boasts three dental operatories, a portable digital x-ray apparatus, and the capabilities to complete fillings, cleanings, root canals, and acrylic partials as well as necessary extractions and basic oral surgery. Our indigenous staff of two dentists and an assistant provide care two days every week.

MISSIONHAITI  
MEDICAL

### future plans

Our future plans for the dental area include panoramic x-rays, the ability to fabricate crowns and dentures on site, and the development of a community outreach dental team, while working with the Haitian dental school in Port au Prince.

**BUILDING  
QUALITY  
HEALTHCARE**

Saintard, Haiti + surrounding communities

You can partner with our dental department by providing prayer, supplies, education, finances, a visit or if you would like more info, contact Chelsea Steiner
