

LABORATORY SERVICES Hôpital L'Eglise de Dieu Réformée

about

MISSIONHAITI
MEDICAL

The need for lab tests for our patients became an obvious need as our outpatient department continued to expand. At first we had only blood smears and microscopes, with a few quick tests to do the very basics. With the purchase of a basic blood chemistry analyzer from WorldWide Labs (Kalamazoo, MI) in 2017, the hospital was equipped to expand its laboratory services. Currently the facility employs six lab technicians and is one of the busiest departments in the hospital. Open around-the-clock to supply the needs of the 24/7 urgent care department, this corner of the hospital is rarely without patients to serve.

future plans

Our hope is that in the near future, we can continue to automate our blood analysis to make the wait-time much less for our patients, who often need to return days later for results.
